

NAG Library Function Document

nag_write_line (x04bac)

1 Purpose

nag_write_line (x04bac) writes a single line to an external file.

2 Specification

```
#include <nag.h>
#include <nagx04.h>
void nag_write_line (Nag_FileID fileid, const char *line)
```

3 Description

nag_write_line (x04bac) may be used to write to files opened with nag_open_file (x04acc).

4 References

None.

5 Arguments

- 1: **fileid** – Nag_FileID *Input*
On entry: the identifier of the file to be written to. This must have been returned by a call of nag_open_file (x04acc).
- 2: **line** – const char * *Input*
On entry: a character-string. This is written to the external file as a single record. Trailing blanks are not output, except that if **line** is entirely blank, a single blank character is output.

6 Error Indicators and Warnings

None.

7 Accuracy

Not applicable.

8 Parallelism and Performance

nag_write_line (x04bac) is not threaded in any implementation.

9 Further Comments

None.

10 Example

See Section 10 in nag_open_file (x04acc).
